fruity loops is the best software update for musicians, engineers, producers... It's also free! not too shabby. Features include virtual instruments, live set creation, automation of multiple parameters at once - all in one interface! Here are some cool features fruity loops 5 has to offer: - Virtual Instruments : Create your own synth presets with a wide variety of sounds and effects. Use the included LFO to modulate any parameter - or even use it on everything in your current patch to create fantastic new textures. Some of the world's most popular virtual instruments are included with fruity loops 5 so you can get started quickly. - Live set creation : The new layered approach for sound design allows you to create entirely new instruments, layering loops and samples into a complete track. Create a bassline, build a drum track and then add a lead synth before it's time to finalize the mix... all from one window. - Mixdown : With hardware capability built right in, fruity loops allows you to mixdown your tracks from anywhere within the application. Simply select your master output device and start recording - or use the onboard metronome to keep track of beat placement while you finalize your mix. All of the included virtual instruments are compatible with the latest DAWs, but if you want to run them at their very best - you'll need to purchase fruity loops 6. "Fruity loops 5 is a remarkable piece of software at a price that's impossible to beat."
- macworld.com "With its impressive studio suite of more than 20 music applications for free, fruity loops 5 is an essential download for all prospective producers."
- creativepro. com "The included virtual instruments and effects sound great, and they'll help you come up with professional-sounding tracks at the drop of a hat."
- pcmag.com
