Maaloularieh, A Synthesis of Sake Chemical Composition.pdf -c95a737f3ea93069dQ:
Use custom data type in Jena-ARQ I want to use custom data type for this model in Jena-ARQ. This model is based on RDFS and OWL 2, with properties in a dot notation:
@prefix : . @prefix rdfs: . @prefix owl: . @prefix xsd: . @prefix rdf: . @prefix arq: .
@prefix rdfa: . rdf:type :Person; :hasDatum :pgr@1 ["Peter Grilli"@en "Peter Grilli"@es]. rdf:type :Person; :hasDatum :datum@1. :datum@1 rdf:type :TestDatumType; :hasDatum :datum@1. :datum@1 rdf:type :DatumType; :hasDatum :datum@1. Question: How can I use a custom datatype for the datum property? I can't find an option in the Jena-ARQ source code that would make the triple store understand the datatype as provided in this sample. A: You need to use the Jena property class for custom classes

. . . Not everything in my life is beautiful and smooth, Not everything in this life I like too, But how nice that you are to me today
He said don't worry in my heart. Don't be afraid, don't repent, I won't cry. And without shedding tears, I will answer with a smile
I just love and, of course, I wish: You very gently, and sincerely, meeting Let there be only sunsets in my life, May I be happy
and serene Let me be loved and I will be glad You are sweet and gentle every day. Let my luck be with you, fffad4f19a
